

Acura® manual
your expectations – our tradition

digital reading micropipettes

Acura® *manual* pipettes are precision instruments combining high-tech materials with exceptional, user friendly ergonomics.

A choice of models brings much more than superior performance and makes pipetting safe and agreeable.

The Acura® line features:

- Effortless activation
- Smart and reliable volume adjustment
- Precision digital display visible at all time
- Justip™ adjustable tip ejector fitting most tips
- Swift-set user calibration system
- Shock, UV-light and autoclaving resistance
- CE certified IVD 98/79 EEC

The Acura® *manual* models

► Most comfortable pipetting

The line fits everybody's hand with or without glove. Ergonomic shape, light weight and soft plunger travel care for optimal comfort.

► Smart and reliable volume adjustment

State-of-the-art micrometric setting is performed smoothly and precisely by turning push button. Finely machined click-stops and free rotating cap prevent any unwanted volume alteration.

► Digital display always visible at a glance

Located on the front of the instrument, the display window allows set volume to be visible at all times during pipetting. A comforting reassurance for the user.

Universal micropipettes

The classic Acura® manual 825 is intended for all applications. It brings convenience, comfort, safety and sturdiness. For sure the wise choice for any laboratory.

825
micro

0.1 – 2 µL
0.5 – 10 µL
1 – 10 µL
2 – 20 µL
5 – 50 µL
10 – 100 µL
20 – 200 µL
100 – 1000 µL

Work station Twister universal 336

Rotary stand holds up to six single channel pipettes of most brands. Seven translucent colours to choose from.

► Acura® manual 825/835 Triopack

Nine different packs up to 10 mL, each containing three adjustable micro-pipettes, to cover all individual requirements in any research or routine application. Available at attractive saver prices, they match with today's budget constraints.

Universal work station 337

Space saving stand holds up to seven single channel pipettes of most brands. Anti-slip pads guarantee bench stability. Available in five pastel colours.

Extra sharp micropipettes

Derived from the Acura® *manual* 825, the 826 XS line was designed with the research scientists in mind. Shorter, smoother, lighter in weight, the eight models offer key features aiming at excellence in pipetting.

826 XS micro extra sharp

0.1 - 2 µL
0.5 - 10 µL
1 - 10 µL
2 - 20 µL
5 - 50 µL
10 - 100 µL
20 - 200 µL
100 - 1000 µL

Narrow conical shaft end

Small diameter provides for easy access to microtubes.

Short shaft

Length reduction greatly enhances precision of hand movement and guarantees superior drivability.

► Tip ejection – easier than ever

Most ergonomically positioned, the large surface, soft padded ejector button provides for low-pressure activation. In addition to ease of tip ejection, the shaft height adjustment system called Justip™ (>4 mm span) – controlled by efficient click-stops – allows a wide selection of tips to tightly fit the nozzle.

► Extra smooth activation

Unique tightness lip seal and new springs provide for ultra-soft pipetting, reducing hand fatigue while working.

Pipetting		Overshoot	
Start	End	Start	End
≤1.6 N	≤2.8 N	≤9.3 N	≤11.5 N

* 1 Newton (N) ~ 0.1 kilogramme force (kgf)

Above forces, measured on a 20 - 200 µL model, are indicative of very limited finger efforts. Yet, the overshoot stop offers a clear tactile indicator.

A must for research scientists

The extra sharp pipette is optimal in any fine applications such as pipetting in microtubes or microplates.

Performance and weight Acura® *manual* 825 and 826 XS

Performance values obtained with bidest. water at constant temperature (± 0.5°C) comprised between 20 and 25°C in accordance with ISO 8655. ¹⁾ measured at 0.5 µL ²⁾ measured at 1 µL

► Acura® *manual* XS 826 TwixS pack

Six different packs up to 1000 µL, each containing two adjustable micropipettes and a free pipette holder, to cover all individual requirements in any research application. Available at attractive saver prices, they match with today's budget constraints.

► Nozzle protection filter

Macro models accommodate interchangeable nozzle filters for added protection against liquid overflow and barrel contamination.

► Pasteur pipette adapter

Optional adapters allow fitting of glass Pasteur pipette on 2 and 5 mL models in addition to Polypropylene tips. The adapters include two O-rings guaranteeing proper holding and tightness of any standard 2 mL Pasteur pipettes (Ø 7 mm).

► Smarties caps colour coding at will

Free rotating colour caps protecting against unwanted volume alteration, can be changed for individual, lab or department identifications. Pick among 14 different colours or choose the *smartie* mix including all of them for unlimited combinations.

► Shelf pipette holder 332 for two instruments

Fitting micro, macro and/or multichannel pipettes, its attractive design accommodates all Acura[®] and Calibra[®] instruments. The self-adhesive strip supplied ensures lasting attachment on any surface.

Fixed volume micro and macropipettes

They show most stable performance and provide consistent results for any analytical or routine tests.

No risk of erroneous volume setting.

Available in a selection of micro sizes from 1 to 1000 µL and macro volumes models of 2, 2.5, 5 and 10 mL.

815 / 835F

fixed

1 µL to 10 mL

Multi and single channel pipette work station 340

Innovative design fits three Calibra[®] and Acura[®] models. Easy reach of each instrument. Heavy bottom plate and anti-slip pads guarantee high stability.

► Optimal working position

In addition to the ergonomic design and perfect hand fitting of the pipette, the multichannel volumetric module revolves to allow the selection of the best working position.

► Adjustable tip ejector

Height of tip ejector can be adjusted in no time within a 4 mm span to perfectly match to tip used. Bowed shape of ejector head guarantees effortless, easy sequential tip ejection.

► All purpose reservoirs

Well adapted for multichannel pipettes, the reagent reservoirs offer various shapes in different configurations at economical cost. See page 6.

Qualitips® pipette tips

These superior pipette tips cover a range between 0.1 µL and 10 mL. All models autoclavable. Optimal tightness fitting on Socorex pipettes and broad compatibility with other brands.

N	100 µL (10 - 100)	1000 µL (100 - 1000)	826.TWX.N
Q	200 µL (20 - 200)	1000 µL (100 - 1000)	826.TWX.Q

► Instant calibration

All Acura® *manual* models include the *swift-set* user calibration system - with integrated key and locking mechanism - making tedious procedures a thing of the past. Easy and precise, it is in full compliance with international standards and recommendations.

► Safety seal sticker

Though easily removed when needed, the switch protection seal is autoclaving resistant. Replacement service stickers (5 ea.) included with each pipette.

Calibration seal stickers

Replacement seals	25 / pk	1.825.025
Replacement seals	100 / pk	1.825.100

► Minimum maintenance / sterilisation

Easy disassembling for thorough cleaning.

Sterilisation achieved by autoclaving the instrument fully assembled (121°C / 250°F, 20 minutes).

Standards and compliance

All Acura® manual models are designed to perform in accordance with national and international standards such as ISO 8655, GMP, GLP, NCCLS.

They conform to the CE directive IVD 98/79 EEC (in vitro diagnostic medical devices).

QC and warranty

Performance values are obtained with bi-dist. water at constant temperature ($\pm 0.5^{\circ}\text{C}$) between 20 and 25°C, in accordance with ISO 8655. Each micropipette bears its own serial number and passes strict performance control attested by an individual QC certificate.

Three-year warranty.
